PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ year of experience in backend development, microservices architecture, and REST API design. Proficient in C#, .NET 8, and SQL with hands-on experience building scalable, production-grade systems. Skilled in Clean Architecture, SOLID principles, CI/CD pipelines, and agile development workflows. Passionate about solving complex engineering problems and delivering high-performance backend solutions.

TECHNICAL SKILLS

Programming Languages: C Sharp (C#), C++, Python, JavaScript

Frameworks and Libraries: .NET 8, .NET Framework, ASP.NET Core, React.js, Node.js, Blazor, MERN Stack, OpenCV, Entity Framework Core (EF Core), Dapper, LINQ

Databases: MySQL, MariaDB, SQL Server, Relational Database Management

Tools and Platforms: Git, GitHub, Docker, Unix, Linux, Microsoft Azure, Azure Fundamentals

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms, Machine Learning, Clean Architecture, SOLID Principles, Microservices, REST APIs, CI/CD, Agile, Scrum

WORK EXPERIENCE

Osmosys Software Solutions

Hyderabad, Telangana, India

Associate Software Engineer — Backend Developer

August 2024 – Present

- Contributed to backend development of enterprise safety and compliance platform (Oqsha) including Permit to Work, Inspections, IMS, and Audit modules using C# and .NET 8.
- Implemented dynamic workflow systems and granular role-based access control (RBAC) to manage permissions across enterprise modules.
- Engineered a notification microservice using NSQ message queue and a daemon service to process and dispatch asynchronous alerts at scale.
- Developed a CRON-based microservice to automate generation of weekly and monthly summary reports, reducing manual effort.
- Built OsmoStateRouter, an enterprise-grade REST API workflow engine using .NET 8, Entity Framework Core, and MySQL, following Clean Architecture and SOLID principles.
- Designed a multi-dimensional discriminator system to dynamically resolve workflows based on context.
- Improved API response times through strategic in-memory caching and asynchronous I/O patterns.
- Ensured 100% data traceability by implementing structured audit logging and global exception-handling middleware.
- Integrated Dhilog, a centralized error-logging platform, across frontend and backend systems to capture stack traces and accelerate root cause analysis.
- Developed backend features for PineStem, an internal Agile project management tool, covering sprint management, task tracking, and automated notifications.

Osmosys Software Solutions

Hyderabad, Telangana, India

Software Engineer Intern

January 2024 – July 2024

- Completed comprehensive technical training in HTML, CSS, JavaScript, C#, .NET, SQL, Dapper, LINQ, and Blazor.
- Gained hands-on experience setting up CI/CD pipelines and using Git for version control in a collaborative team environment.

- Contributed to the initial development of PineStem, building foundational backend features for managing projects, user stories, resources, billing, and efficiency metrics.

PROJECTS

Parking Lot Slots Detection Model | Python, OpenCV, NumPy, Matplotlib July 2023

- Built a machine learning and computer vision model to analyze real-time parking lot footage and detect available parking slots.
- Dynamically identified total available slots and their exact spatial positions using image processing techniques.

Personal Portfolio Website | React.js, HTML, CSS July 2023 – Present

- Developed a responsive, interactive single-page application (SPA) to showcase professional experience, projects, and technical skills.
- Deployed and hosted the web application using GitHub Pages.

Full-Stack Blog Website | MERN Stack — MongoDB, Express.js, React.js, Node.js May 2022 – July 2022

- Built a responsive full-stack blogging platform with separate views for public users and admin controls.
- Implemented an admin dashboard with full CRUD (Create, Read, Update, Delete) functionality for blog post management.

EDUCATION

Graphic Era Hill University August 2020 – August 2024

Bachelor of Technology in Computer Science | CGPA: 8.2 / 10

Mnemonic Convent School April 2019 – April 2020

12th Grade — Science Stream | Percentage: 93%

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Digital Marketing Certification — Google Digital Garage
